TIMELY QUESTIONS AND ANSWERS Reform is the child of agitation. Con gress is about to meet. Now let the people of the valley make themselves heard in the legislative halls. Nothing whatever is to be gained by delay. We must hold up the hands of our Congressional delegation. There never was a time when the evidences of the destructiveness of of the chief State of the Pacific slope at but the hight of fifteen feet six inches pouring through an opening in its banks near Sacramento wider than the river it self. Why? Because the Federal Government neglects its duty, and refuses to se act as to confine the river to its proper channel and make it do its full duty as a waterway and scouring agency. But suppose it were so confined, as it should be and was until the people were financially exhausted with the effort to keep the west bank secure against the assault of the American river, where would the scour ings go? Into the bay of San Francisco to be sure, to work the destruction of the finest harbor possessed by the United States. What, then, should Congress do? Rectify the river channel, compel it to de its duty, and stop the descent of the matter into it that gives the river a greater burden to carry than is its due. How shall this be done? By perpetually enjoining hy draulic mining, and all devices to carry or that industry to the injury of the stream and at the same time to apply engineering skill to the preventiou of the descent of the way, in the person of Boggs, of Napa, the matter already below the mines. SCHEME FOR THE SUSPENSION OF HOS TILITIES.

St. Petersburg, November 24th.—The Journal de St. Petersburg to-day says: 'Upon Russia's initiative the powers are omoting a scheme for the suspension of ostilities in the Balkans, but hopes are entertained that Servia and Bulgaria, al-though incapable of resisting the promptings of their passion, will become sensibl enough to see that it is to the popular interests of both countries that they, of their own accord, sheathe their swords. SOFIA EXCITED.

Sofia, November 24th.—The city is wild with excitement over news from the front, stating that Prince Alexander, at the head of the Bulgarian troops, has followed up his victory, and is driving the Servians slowly but surely from Bulgarian territory. TSARIBROD TAKEN.

Sofia, November 24th.—The latest dispatch says Prince Alexander stormed the heights of Tsaribrod, and occupied the city last evening. The Prince made a triumpha entry into the city, and was received with enthusiasm by the populace.

THE SERVIANS STILL RETREATING-BULGA-RIAN SUCCESSES.

Belgrade, November 24th .- The Ser vians are continuing the retreat, and the main army is now in Servian territory. The troops seem to be demoralized, and since the recapture of Tsaribrod by the sulgarians, they have fallen back without offering any resistance to the victorious Prince Alexander. The Bulgarians have occupied all the positions recently held by the Servians in Bulgaria, and are advancing to the frontier. The Servian headquarters are now at Pirot. into my stomach. It's all right now. I went down handle first, and came ou The steamer Modoc, which arrived at Rio Vista at 2 A. M. yesterday, in leaving point first; but it's out now, and I don't her landing, ran against and sank a vessel which was tied up to the wharf. Those on the steamer were unable to see what kind of a vessel it was, or whether anyone was on board or not, as the boat immediately sank out of sight. The Modoc was stopped, boats lowered, and everything done to rescue anyone from drowning that might be found struggling in the water. After considerable search no one was observed, and it was decided that if anyone was aboard they had found a sudden and watery grave. On the arrival of the Modes at Sacramento, Captain Foundit knife I could hardly credit the statement I asked him what he had done to remove it served, and it was decided that if anyone was aboard they had found a sudden and watery grave. On the arrival of the Modoc at Sacramento Captain Fouratt received the following telegram from M. Christensen, the company's agent at Rio Vista: "It was the steamer Margie that got wrecked. There was no one on board." Captain Fouratt says the accident would not have happened had those in charge of the Margie had out their lights. The night was dark, and those upon the Modoc were unaware of the presence of the little steamer until she was struck by the large vessel and sent immediately to the bottom. The Margie at one time belonged to the State, and was used by the State Engineer, Colonel Ham. Hall, in making a survey of the bays and rivers. She was a propeller, strongly built year greatly had a large that if anyone watery grave. I asked him what he had done to remove it. He replied some had advised taking sweet oil, others castor oil, salts, etc. I said, 'Well, I suppose you took all of them?' 'No, I id id not,' he replied, 'I have taken nothing.' 'All right,' I replied, 'you have saved your life by not doing so.' Well, sir, I put him on a buckwheat dit. That was all I let him eat or drink, buckwheat is not easily digested, and I knew it would form a ball around the knife, and thus allow it to pass along its circuitous route without doing injury, the blade and rough edges being completely covered with a thick and smooth coating of buckwheat. It acted just as I expected. The blade came first, and although Johnny has lost a few days' time, he did not lose his knife. the bays and rivers. RAINS AND PROSPECTS .- Hon. John Boggs, who is in the city, referring to the statement that the rainfall thus far the present nth exceeds that of the corresponding th of any previous year, says that in the year 1849 it commenced raining on the second day of November and continued during the whole month with scarcely a fair day. He thinks it probable that i there had been opportunity for as accurate measurement then as there is now, the amount would have been found equal, if not greater, than the present season. That November was followed by a very wet win-ter, the rains continuing until late in the spring. He regards the outlook excellent a prosperous agricultural season. There has been a large breadth of summer fallowed lands already put in, and also of volunteer, upon both of which the grain has come up well, and the growth is rapid, The rains having wet the ground thoroughly so early, there will also be a large area of winter plowing and sowing. All these give promise of a very large crop of grain next year and a prosperous season for the State. Mr. Boggs last evening received a dispatch from Red Bluff, saying the river had reached 20 feet at that point, and was Jising rapidly.

BRIEF NOTES.

Yesterday was the most unpleasant day of the season in Sacramento, a high wind prevailing, heavy showers of rain falling, and the air being cold. The Pink and Blue party that was to have taken place at Arno to-morrow even-ing has been, on account of the continued

wet weather, postponed. Frank Dupoister has brought back from San Francisco the two-year-old fillies Edle-weiss and Maggie D., which were engaged in races of the Blood-Horse Association. Rain fell freely yesterday at all points between this city and Colfax, but above that place it was snowing, but not hard. It is reported that the American is higher than before this season.

Edward Jaynes, a clerk at Lambert & Co.'s grocery, fell from a step-ladder yesterday and broke one of the bones of his foot in consequence of its striking against the

changed to a dark-blue color, and the pearl handle had been eaten off one-half by the action of the gastric juices of the stomach, the rivets projecting about the thirty-second part of an inch. "I'll tell you now how I came to swallow it," said Johnny. "I was talking to some girls, and eating a pear at the same time, cutting off small portions of it with my knife, when I said, 'I can completely hide this knife in my month.' I put the blade in first, but I could not close my lips without making it prick my tonsils. I took it out and put the handle in first, and then holding the ron sill of the store door. The Sacramento river rose slowly yesterday morning, and at 2 p. M. registered 17 feet 1 inch. At 11 o'clock last night it was up to 18 feet 2 inches, and will probably be onsiderably higher to-day and to-morrow.

Michael Keefe, who killed his wife at Vallejo on Monday, and then attempted suicide, formerly lived in Sacramento counany more. No pocket knife ever gets above my lower lip again. In fact, I don't think jack-knives were made to swallow, any how." Hackmen and others who have occasion drive through the streets at night comain that in front of some of the busines uses the canvas awnings are pushed out ver the street by means of poles, in order o keep rain from the sidewalks and at the ame time not shut off the light. In many nstances these awnings are allowed to s gerous to the drivers of high vehicles, who, happening to drive close to the sidewalk, H. C. Wolf, reported that for the week ending Saturday, November 21st, 16,826,000 are apt to be knocked from their seats.

It seems probable that something will have to be done relative to improving the carrying capacity of the sewers in the lower portion of the city. That on Third street, at the corner of M, has been so crowded that the water it could not carry was forced up through the trap and flooded he street; and water was yesterday boiling up through the trap at the corner of the alley on the west side of Fourth street, between M and N. It is said that the sewe pipe is small at the portion of the city where it should be large, and consequently cannot accommodate the water that is lrained from other portions of the city. Harry Hansen and Pat. Rich, two steamboatmen who were on a spree, indulged in a wrestling match on Front street, between and M, yesterday about noon, during which the former, who is a very powerful man, threw his opponent at will. The amusement degenerated into a fight. Officer Frazee arrived, and, not considering himself competent to arrest both men, tele-phoned for assistance, and, local Strader sponding, the disputants were taken to he lockup. Frazee says that citizens who ere present before Strader came wanted to know why he did not take the men himelf, but when he asked if any of them would assist him, none would volunteer. Controller Dunn refused to certify the money into the treasury? The matter came up before Judge Sullivan at 10 o'clock this morning. Ex-Judge J. H. At the afternoon session of the Cour Controller Dunn was placed upon the stand, ected for railroad taxes by the Attorney 11th of \$474,062 30, and another on Septem ber 18th of \$329,420 63. These were the only formal tenders made, but he had about the tax money prior to June 11th. Witness said he had accepted none of the money on the ground that it was no part of the revenue of the State, as he was advised by lawyers, and even if he had been disposed to accept the money it would have been impossible for him to certify it into the Treasury. The Attorney-General had never transmitted to him any statement of the tax money in detail of the years for which it was due and for which years it was on account. He testified that he had asked the Attorney-General for such a statement, but had received. ment, but had received none as yet. In fact, the Attorney-General had never an-

swered the letter. Dunn then read the correspondence which bassed between the Attorney-General and himself relative to the matter. Witness gave as an additional reason for refusing the money, that Judge Field had stated that he would not reopen any of those cases unless the money was placed in the hands of the Court, or returned to the railroad companies, and that no one had any power to draw it from the treasury if once placed

This mine is in a side channel of the Carrie Hale, which recent developments have proved to be very rich. F. R. GIRARD, There are no mills as yet on these mines. The gravel is simply washed with water. By this process much of the gold is lost, for there is a great quantity of very rich cement among the gravel. This cement is so hard that the gold cannot be extracted from it till it is run through a mill. Many pieces of it weighing from one to five pounds can be picked up in the flume after this cement was assayed recently and was found to contain as high as \$66 to the ton.

There is no doubt that with a proper milling process this cement could be made to pay the expense of working these mines, leaving the rich yield from the gravel as a profit to the fortunate owner.

Cowed by her justifiable anger, the gen-teel, well-dressed debauchee went out upon the platform. The little lady quickly sprang to the door, braced herself against it, and cried out, "Now come in, if you can!" And he did not come in

And he did not come in!

It requires a deal of pluck for a woman to insist on personal rights, but it pays. We were forcibly impressed with this fact by a conversation had last week with Mrs.

S. A. Clark, of East Granby, Conn. Many a woman, pursued by a vengeful foe, will appreciate what she says.

An open foe, she says, she could meet; but an ambushed enemy was horribly exapperating. She called to her aid the wisest and most discreet friends she had.

She expended all the money she could spare to detect and disarm him. But she spare to detect and disarm him. But she says.

Ten long years of such annoyance at length broke her down. Back ache, headache, irritability, spinal weakness, hot head, cold hands and feet told her that the effect was getting fatal. Her health and spirits finally broke down under the strain, and in 1875 she suffered unutterable tor-Judge Sullivan-The Court is to try the tures for several months from vesical inissues and report its facts to the Supreme flammation. In 1878, renal hemorrhage and gravel, with frequent attacks of chills and fever, overcame her.

Her sufferings, she says, surpassed description. Finally her stomach refused all solid food, and for a month she lived on a teacupful of milk three times a day. Nervous prostration ensued. Sleep was impossible. Walking was out of the question and in despair of relief she took to her bed expecting to die. She tried every reputable school of physicians, who agreed that her worriment had produced a combination of desperate diseases common to women in iddle life. While they were treating one he others grew worse.

WHEAT—For several days the market has shown declining tendency, and sellers who desired to realize have had to meet the market at lower figures than prevailed a week ago. Yesterday the market was quite soft, and it was no easy task to find a buyer at \$1.40 \text{p} \text{ctl}. Still some few lots were placed at this figure, and more would have been furnished had disposition been shown to purchase with any freedom. To-day the situation is worse. Exporters have reduced their limit for No. 1 grade to \$1.37\(\text{g} \) ctl, and show but little inclination to purchase ahead of immediate requirements even at this comparatively low rate.

Call Board sales at the morning session of the San Francisco Produce Exchange were as follows:

THE "HOME SEEKER."

The Immigration Association of North

ern California is now preparing to issue the November number of the "HOME SEEKER." It is to be enlarged, and fully illustrated with lithographic views of Northern California. It will contain practical information of the resources and advantages of the Northern Coun-

and advantages of the Northern Counties. All the proceeds of this publication will be devoted to the carrying on or immigration work. We appeal to the business men of the Northern part of the State to give it their advertising support. By so doing, the work of bringing an increase of population to the State will be carried on. At Ogden a copy will be put in the hands of each incoming passenger. In addition to this, several thousand copies will be dis-tributed on the trains leaving Chicago, in order to attract the settler intending to settle in other States and Territories Give the "HOME SEEKER" your sup
